Recommendation A. 7.

1. We concur in this recommendation.
2. The low continuing intelligence potential of the area has been reasonably well demonstrated; however, further study should be made of the effect of the closing of this resident agency on the efficiency of its parent office in [REDACTED] and of the possibility of some reallocation of responsibilities for the area. It is believed that the date of the closing of the resident agency should depend upon the results of such a study and should not be fixed at this time. 25X1A6a
